RISHIKA BAJAJ

AI/ML Engineer · Deep Learning · Generative AI · LLMs

(+91) 7222948499 · rishikabajaj3154@gmail.com · Jaipur, Rajasthan · GitHub: RishikaBajaj31 · LinkedIn: Rishika Bajaj

PROFESSIONAL SUMMARY

Results-driven B.Tech AI & ML student (CGPA 9.00) with hands-on experience building production-grade AI solutions — from intelligent document pipelines and Generative AI assistants to computer vision systems. Proficient in Python, LangChain, PyTorch, and cloud deployments. Adept at taking projects from ideation to deployment, with a strong foundation in NLP, deep learning, and MLOps.

TECHNICAL SKILLS

Languages: Python, SQL

Frameworks & Libraries: TensorFlow, Keras, PyTorch, scikit-learn, NLTK, LangChain, LangGraph, RAG, FastAPI, Streamlit, Gradio, Docker, Kafka, Playwright, Pandas, Matplotlib, PyMuPDF, SQLAlchemy, Redis, Next.js, TailwindCSS

AI/ML Specializations: Machine Learning, Deep Learning, NLP, Computer Vision, Generative AI, LLMs, Transformers, Fine-tuning, Vector Databases, Prompt Engineering, MLOps, Data Science, Big Data Analytics, OCR (Optical Character Recognition)

Tools & Platforms: GitHub, Google Colab, Amazon AWS, Power BI, Figma, Canva, Hugging Face Spaces, Docker, Kafka, PostgreSQL, Gemini API, Redis, WebSocket, Streamlit Cloud, Playwright, Selenium, Scrapy, Requests

WORK EXPERIENCE

AI Intern | Greenfinch Global Consulting | *On-site* *Oct 2025 – Apr 2026 (Ongoing)*

- Led development of AI-driven automation and reporting solutions using Python, Streamlit, and REST API integrations, enabling scalable enterprise workflows and reducing manual processing time by ~40%.
- Built and enhanced document intelligence pipelines including data extraction, interactive dashboards, and REST API-driven processes deployed across real-world enterprise applications.
- Collaborated cross-functionally to deliver intelligent automation tools that reduced manual turnaround time and improved data accuracy across business units.

AI & Prompt Engineering Intern | Vault of Codes | *Remote* *Aug 2025 – Sep 2025*

- Built and deployed a production-ready AI Assistant using Groq API, Gradio, and advanced prompt engineering for tasks including Q&A, text summarization, and creative content generation.
- Engineered optimized prompts and integrated user feedback loops to improve AI response quality, demonstrating applied expertise in NLP and LLM deployment.
- Published and maintained the assistant on Hugging Face Spaces, gaining real-world experience in AI model deployment and version management.

PROJECTS

Rajasthan E-GRAS Automation · Leading Project

- Architected and deployed a **production-grade automation system** for Rajasthan's eGRAS portal, enabling end-to-end e-Challan generation (login → form filling → QR extraction → UPI payment → receipt generation) using Playwright-based browser automation, Kafka-based real-time pipelines, and OCR-based captcha solving — **reducing manual processing time** from several minutes to ~60–70 seconds (~70–80% improvement).
- Built AI-driven document processing pipelines using Gemini OCR for captcha resolution, automated form filling, and real-time data validation; coordinated with stakeholders to meet compliance and audit requirements for a government-scale deployment.

Multi-Agent AI System · Deployed Web App

- Architected and deployed a modular multi-agent AI system enabling dynamic query routing across data and document processing pipelines.
- Developed specialized agents — **DataAgent** (Pandas, Matplotlib) for structured data analysis and **ResearchAgent** (Hugging Face Transformers, PyMuPDF) for PDF summarization — with an **Orchestrator routing queries** by intent; deployed on Streamlit Cloud.

AI-Powered Hospital Management System · Patent Filed

- Designed an AI-driven hospital management platform integrating telemedicine workflows, and predictive analytics for real-time bed allocation, appointment scheduling, and resource optimization.
- Filed a patent (Application No. 202511039061 A), published in the Indian Patent Office Journal (May 2025), for an intelligent healthcare system enabling data-driven decision-making and improved operational efficiency.

EDUCATION

B.Tech — Artificial Intelligence & Machine Learning *2022 – 2026*

NIMS University Rajasthan, Jaipur · **CGPA: 9.00 / 10**

CERTIFICATIONS & ACHIEVEMENTS

Certifications

- UI/UX Design using Figma - GUVI
- AI Fluency: Framework & Foundations - Anthropic
- Smart India Hackathon 2024 — Finalist
- Smart India Hackathon 2025 — Participant

Achievements

- Published Author — Debuted "The Quiet Girl", an original poetry collection that blends introspection with literary craft, proving that the best engineers also know how to move people with words.
- National Merit Rank #8 — UCMAS Abacus: outperformed thousands of participants nationwide, a testament to the raw computational thinking and focus that now powers my work in AI.
- Research Paper Accepted — “Machine Learning using PySpark”, NIMS University, Jaipur. Investigated PySpark’s MLlib for large-scale ML tasks, benchmarking Logistic Regression, Decision Tree, and Random Forest on distributed big data pipelines.
- Patent Filed (Application No. 202511039061 A) — “Hospital Management System”, published in The Patent Office Journal No. 20/2025 (16 May 2025). Co-invented an AI-powered hospital platform integrating IoT, telemedicine, predictive analytics, and real-time bed/appointment management.
